

STAAR 100-Point Scale Overview

The State of Texas Assessments of Academic Readiness (STAAR®) 100-Point Scale allows for the comparison of a student's performance with the performance of other students who took the same STAAR assessment. The 100-Point Scale is defined using percentiles, which represent the percentage of students across the state who took the assessment and scored at or below the score. For example, a score of 100 on the STAAR 100-Point Scale indicates that the student performed as well as or better than 100% of the students who took the assessment. A score of 0 indicates that the student performed as well as or better than 0% of the students who took the assessment. The STAAR 100-Point Scale is used to report student performance on the STAAR assessment.

STAAR 100-Point Scale Overview

- What if my student's scale score does not appear in the 100-Point Scale Table?

There are different versions of each STAAR EOC assessment (paper, online, braille, etc.). While scale scores are equivalent across versions, each version and administration may result in different specific scale scores. The specific scale scores listed in the 100-Point Scale Table are the ones from the regular STAAR assessment administered on paper during the spring administration. If your student's scale score is not listed in the table, a range for the percentile can be obtained. The percentile associated with your student's scale score is between the percentiles for the scale scores in the table just above and just below your student's scale score.

For example, consider a student whose scale score on the Algebra I EOC assessment is
