

Summer Safety Audit Webinar

July 12, 2022

Agenda

*f*Exterior Door Summer Audit

*f*Summer Targeted Partial Safety Audit

*f*Key Dates/Certification/Data Protection

*f*Questions

Please use the Q&A feature for any questions

Exterior Door Summer Audit

Designed to

- Assist school systems with identifying and tracking door components that are integral to school safety.
- Be used by those performing a campus site inspection to determine that for each door is currently functioning as intended and not in need of maintenance.
- Allow school systems to use the information to begin repairs on any non-operational components.

Summer Targeted Partial Safety Audit

f Use of this tool is not a substitute for a full security audit as required

Summer Targeted Partial Safety Audit

The Texas Education Agency (TEA) coordinated with the Texas School Safety Center (TxSSC), representatives from the regional service centers (ESC), and district and charter school (school system) personnel to develop this tool.

The Summer Targeted Partial Safety Audit is designed to assist school systems with the following:

1. assessing current aspects of certain high yielding safety and security practices, and
2. identifying actions to make campuses more secure prior to the start of the new school year.

Summer Targeted Partial Safety Audit

- Option A
